

THREE-STEP LIP TREATMENT PROTOCOL

“Your Lips will have a Ball!”

This three-step lip treatment was designed as an add-on treatment during a facial. Integrate the following steps during the facial as indicated. This treatment can also be performed as a stand-alone lip treatment.

STEP 1

- **EXFOLIATE: Citrus Enzyme Lip Exfoliator**

use during the exfoliation stage of a facial

Remove lipstick or foundation from the lip outline area using one of the following cleansers:

- **Stone Crop Gel Wash** – for oily to normal skin types
- **Calm Skin Chamomile Cleanser** – for sensitive, rosacea, irritated, normal to dry skin types
- **Coconut Milk Cleanser** – for dry skin types

Apply a thin layer of the **Citrus Enzyme Lip Exfoliator** to the lip outline and lip surface. Allow to remain on for 5 minutes and remove with a damp sponge and blot with a tissue or clean towel.

STEP 2

- **COMFORT: Lip Comfort Plumping Masque**

apply during the masque step of a facial

Following lip exfoliation (step 1) apply a thin layer of the **Lip Comfort Plumping Masque** to the lip outline and lip surface. Allow to penetrate for 5 minutes then remove with a damp sponge and blot with a tissue or clean towel. Follow with the **Citrus Lip Balm** for best results.

STEP 3

- **PLUMP & HYDRATE: Citrus Lip Balm**

apply as the last step of the facial, after moisturizer and Sun Defense Minerals application

Apply the **Citrus Lip Balm** directly to the lips. For best results, recommend the take-home retail **Citrus Lip Balm** and ask the client to use as often as required on a daily basis. Plumping action comes from continued use.

Benefits: This treatment is completely petroleum and paraben-free. Petroleum is a gasoline-derived chemical that appears in most lip products and can create a dependency that dries the lips over time. The rich Shea Butter content of Éminence lip treatments will heal the lips and help break the drying cycle of petroleum-based lip products.
