### **Role Summary**

The Front-End Web Developer is responsible for developing and enhancing Eminence Organic Skin Care's corporate websites and web-based business applications. The Front-End Web Developer is responsible for developing reusable, scalable and maintainable web-based solutions.

### **Our Products**

Eminence Organic Skin Care provides premium products and unparalleled service to leading salons, spas and beauty professionals. Pioneer of the organic skin care movement, Eminence Organics combines more than half a century of herbal craftsmanship and innovation with Hungarian-inspired healing to offer results-oriented treatments. All of our products use only the freshest ingredients known to nature without harming animals or using any harsh chemicals - we pick only premium quality ingredients to craft natural, organic and Biodynamic® skin care that is good for the earth and good for the skin. Every ounce of our products receives personal attention throughout production and packaging.

Eminence Organics cares about the environment and integrates sustainable practices into every part of our business including planting a tree for every product that we sell through our [Forests For The Future](#) initiative.

### **Our Company**

Eminence Organic Skin Care is the leading name in the field of Organic Skin Care. Eminence Organics is renowned as the most unique and effective line of natural skin care products on the market today.

Eminence Organic Skin Care has been voted by skin care professionals as "Favorite Skin Care Line" and "Favorite Product Education", both for eight years in a row, as well as "Favorite All-Natural Line" for seven years in a row, and is considered #1 for skin care results in the natural & organic spa industry. Additionally, Eminence Organic Skin Care has won multiple ["Best of the Best" readers' choice awards](#) for the best skin care products available, awards that are the most unbiased, prestigious honours given in the industry today.

Eminence Organics has also won multiple Environmental Awards & is a [Certified B Corporation](#)®, recognizing the sustainable farming & green practices we use to create our products as well as recognizing the progressive people practices we exemplify in supporting our team-members.

Since the arrival of Eminence Organics in North America, our business has experienced tremendous growth in every major market in North America and has created distribution channels in over 50 countries.

Currently with over 300 team-members worldwide and with thousands of dedicated and loyal spa and salon business partners, Eminence Organics has products which touch millions of faces and bodies across North America and throughout the world each year. Our charitable initiatives, including the [Eminence Kids Foundation](#), impact thousands of lives each year.

**The Core Values**

Extraordinary Service, Infectious Enthusiasm, Sincere Respect, Supportive Teamplay, Proactive Reliability, Passionate Dedication.

**Reporting and Peer Relationships**

The Front-End Web Developer reports directly to the Digital Manager and will work closely with the Web Developer, the Digital Marketing team and work cross-departmentally throughout the organization.

**Overall Roles and Responsibilities**

Duties and responsibilities include, but are not limited to:

**Website Development**

- Design and develop the technical solutions to improve corporate websites and web-based business applications, including coding of all changes

**Website User Experience**

- Contribute ideas for Eminence Organic Skin Care's innovation and continual improvement for the user experience
- Incorporate excellence in design of navigational organization, usability, and accessibility of all websites and web-based applications
- Ensure website compatibility with professional user and Customer-specific browsers and platforms

**Systems Maintenance (Drupal and Wordpress)**

- Manage long-term maintenance, performance, upgrades and other system wide changes
- Support corporate websites (PHP – Drupal and WordPress)
- Troubleshoot and debug issues
- Develop and modify systems, based on Drupal codebase
- Design and build stored procedures
- Perform maintenance programming for existing implementations
- Design, develop and implement internal and external web presence

**Cross Departmental Support**

- Collaborate individually or in combination with the Digital Marketing department, Information Technology/Process Improvement department and Sales department on web-based projects
- Document code (using Github) and report on project deliverables

**Experience Required**

- Credentials in related discipline or equivalent combination of education and experience
- Web solutions programming using JavaScript, JQuery, CSS and HTML
- Experience consuming open and/or private APIs such as Facebook, Twitter and Google; experience working with Drupal functions and API
- Experience with and knowledge of Form, Entity and Views APIs, feature modules, the theming layer, Ajax interfaces, and other advanced topics in Drupal
- Modern PHP (Drupal and/or Wordpress) web development (PHP, RESTful APIs, JSON)
- Experience leading successful web development phases of projects from resource alignment, coding, testing, launch and post launch support is preferred
- Experience using best practice version control methodologies and tools is preferred
- Experience with interfaces and web services is preferred
- Experience developing applications and websites using the Drupal framework including working with Content Types, Fields, Taxonomy, Views, Panels, Features, Modules, etc., is preferred
- Experience in application security roles and authentication practices is preferred
- Drupal Core or module maintainer or contributor an asset

- Active in Drupal community (Drupal.org profile, local user groups, etc.) an asset

**Skills Required**

- Proven knowledge and understanding of Linux/UNIX and Windows environments
- Strong written, verbal and interpersonal communication skills, with an ability to interface well and effectively communicate technical concepts to both technical and non-technical team-members
- Strong commitment to personal excellence and high quality coding standards
- Solution focused and methodical; careful attention to detail
- Strong ability to analyze complex technical and administrative information, identify relevant concerns, recognize alternatives, formulate logical and objective conclusions, and communicate these with end users and management
- Ability to write clear and detailed technical specifications and documentation
- Ability to consistently develop clean, semantic, valid markup
- Ability to multitask and manage time effectively to meet deadlines
- Ability to work in a fast-paced, rapidly changing environment
